Material Safety Data Sheet

1. DETAILS OF THE CHEMICAL AND SUPPLIER

Product name FastGene Scriptase II cDNA 5x ReadyMix

Product code LS64

Recommended use of the chemical and restrictions on use

Restrictions on use

Research and development only
Research and development only

Details of the supplier

Company name Nippon Genetics Europs

Address Binsfelderstr. 77

52351 Düren Germany

Immergence contact number +49 2421 554960

2. HAZARDS AND DANGEROUSNESS

Classification of Hazardes and dangerousness No relevant classification

warning article including prevention methods

Pictorial symbol No information available
Category No information available
Hazardes and dangerousness No information available

Prevention methods

Prevention No information available
Action No information available
Store No information available
Discard No information available

Other hazardes and dangerousness (NFPA) not included in classification

Helath 1
Fire 1
Reactivity 0

3. CONSTITUENT TITLE AND AMOUNT

	Material name	Usual name	CAS No.	Amount (%)
Glycerin		GLYCEROL	56-81-5	15 ~ 30

Next revision at: 14.05.2020

Last revision: 14.05.2019 NIPPON Genetics EUROPE

4.	FIRST	AID	MEASURES	

Eye contact Take medical action immediately

Immediately rinse skin and eyes thoroughly with plenty of running

water for at least 20 minutes.

Skin contact Take medical action immediately

Remove contaminated clothes and shoes and isolate contaminated area

Immediately rinse skin and eyes thoroughly with plenty of running water for at least

20 minutes.

Completely wash clothes and shoes before reuse

Inhalation Remove to fresh air

CPR when there is no breathing

Provide Oxygen when breathing is difficult

Take medical action immediately

Ingestion Do not provide andy food for unconscious person

Do not inject adrenalin

5. FIRE FIGHTING MEASURES

Proper (improper) fire extinguishing agents

Small fire: dry sand, dry chemical, alcohol-resistant foam, water spray, regular foam,

CO₂ (suitable extinguishing agent)

Use Alcohol foam, carbon dioxide or water spray to extinguish fire with this product

Large fires: water spray/mist, regular foam (suitable extinguishing agent)

High pressure water (improper extinguishing agent)

Specific hazards from chemical compounds

Can be ignited by heat, spark, flame Container may explode on heating Some can ride, but not easily ignite

May cause irritation and poisonous gas in case of fire

Inhalation of the substance may be harmful

Some fluids cause dizziness, suffocation-inducing vapors

Protective equipment and precautions for fire fighting

Glycerin

No information available

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective quipment and emergency procedures

Micro particles can ignite fire or explosion therefore remove all the sources of fire.

Separate combustibles from leaked material

Stop leak if it is not dangerous

Do not enter the space without proper respirator until proper air (oxygen

Prevent entry into waterways, sewers, basements and confined spaces

concentration 18 ~ 23,5%) is available

Give attention to materials and conditions that should be avoid

Environmental precautions

Containment and cleaning up In case of small leakage, flush contaminated area with large amount of water

... case of chiam leanage, hack containmated area min large ameant of hater

In case of small leakage, absorb with sand and non-combustible material and place

in container.

In case of large leakage, make a ditch away from liquid spills

Put spills into a clean, dry container with celan shovel, loosley closed, then transfer

container from leak area

In case of powder leakage, cover with plastic sheet to prevent spread and keep dry

Revision Date: 14.05.2019

First created: 17.05.2018

Last revision: 14.05.2019

NIPPON Genetics EUROPE

7. HANDLING AND STORAGE

Precautions for safe handling Note the substances and conditions to avoid

In case of material leakage, reduce the oxagen concentration in the air and cause

Printed at: 18.05.2018

Next revision at: 14.05.2020

suffocation in an enclosed space, so be careful not to spill

Wash trogoughly after handling

Check the oxygen concentration before entering the place because there is a risk of loss of conscious or death due to oxygen defiency at high concentration in the air

Note the high temperature

Keep this termperature below 20°C because this material evaporates slowly and

reaches hazardous concentrations

Do not spray because it will evaporte faster if sprayed

Conditions for safe storage Keep it tightly closed

Store in a cool, dry place

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure standard of chemical compound, biological exposure standard

Domestic regulations

Glycerin TWA - 10 mg/m³

ACGIH regulation

Glycerin TWA - 10 mg/m³

Biological release regulation

Glycerin No information applicable

Individual protection equipments
Respiratory system protection

Use respiratory protection equipments certified by Korea occupational safety and health agency in a release of gas/liquid according to their chemicophysical properties.

Use proper filter or half-circled respiratory protection cartridge equipments if the concentration of release material is lower than 100mg/m³

Use proper filter or loose-fitting respiratory protection cartridge equipments such as hood/helmet shape motor operated equipments or continuous flow protection mask if the concentration of release material is lower than 250mg/m³

Use proper filter or full face cartridge or motor operated half-circled equipments or half circled continuous flow air supply respiratory protection equipments if the concentration of release material is lower than 500mg/m3

Use proper filter or full faced respiratory protection cartridge equipments or hood/helmet type, pressurized mask if the concentration of release material is lower than 10000mg/m³

Use proper filter or auto air supply (SCBA) equipments or pressurized auto air supply (SCBA) respiratory protection equipments if the concentration of release material is

Revision Date: 14.05.2019

lower than 100000mg/m³

Use chemical protection glasses and safety glasses

Page 3 of 8

Install eyewash and emergency shower near work area

Hand protection Wear suitable chemical resistant gloves
Body protection Wear suitable chemical resistant clothing

Eye protection

9. CHEMICOPHYSICAL PROPERTIES

Appearance

State Liquid

Color Dark color to yellow color

Odor Dull

Odor threshold No information available

pH Neutral Melting point/freezing point 20 $^{\circ}$ C Early boiling point and range 171 $^{\circ}$ C Flashing point 160 $^{\circ}$ C ((c.c.))

Evaporation rate No information available

Evaporation rate (solid/liquid) Liquid

Maximum/minimum evaporation or explosion range 19 / 2.7 %

Steam pressure $0.0025 \text{ mmHg} \text{ (at } 50 ^{\circ}\text{C)}$

Solubility water solubility: 1000 g/L at 25 °C solvent solubility: alcohol, ethyl acetate, ether

insolubility, benzene, chloroform, carbon tetrachloride, carbon disulfide, oil ether, oil

Vapor density 3.1 ((air=1))
Specific gravity 1.2613 ((water=1))
n-octanol/ distribution coefficient No information available

Self-ignition temperature 370 $^{\circ}\mathrm{C}$ Disassemble temperature 290 $^{\circ}\mathrm{C}$

Viscosity 954 cP (at 25°C)

Molecular weight 92,09

10. STABILITY AND REACTIVITY

Chemical stability and possibility of hazadous reactions

Glycerin No information available

Situation to avoid

Glycerin No information available

Materials to avoid

Glycerin No information available

Harmful material produce by degradation

Glycerin No information available

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Glycerin irritation, difficult to breath, area, vomit, diarrhea, headache, dizziness, dyssomnia,

kidney problem, paralyzed

Can absorb into the body by suction

Can be absorbed by suction and extinguischer

Through skin, digestive system, can absorb body by inhalation of aerosol

Revision Date: 14.05.2019

Able to absorb into the body by suction of steam

Can be absorbed by inhalation, skin and digestive system

First created: 17.05.2018 FastGene Scriptase II cDNA 5x ReadyMix Printed at: 18.05.2018

Last revision: 14.05.2019 **NIPPON Genetics EUROPE** Next revision at: 14.05.2020
