### 5. Firefighting measures

#### 5.1 Extinguishing media

##### Suitable extinguishing media:

The product is not combustible, adapt the measures to the environment: water spray, carbon dioxide, extinguishing foam and dry extinguishing agent.

##### Not suitable extinguishing media for safety reasons:

High pressure water jet

#### 5.2 Special hazards arising from the substance or mixture:

Can be ignited by heat, spark, flame. Container may explode on heating. Some can ride, but not easily ignite. May cause irritation and poisonous gas in case of fire. Inhalation of the substances may be harmful.

#### 5.3 Advice for fire fighters:

No information available.

### 6. Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures:

Mind the protection measures (section 8). Avoid the contact with skin, eyes and cloth, wear suitable protection equipment. Ensure adequate ventilation. Avoid aerosol formation. Micro particles can ignite fire or explosion, therefore remove all the sources of fire.

#### 6.2 Environmental precautions:

Do not allow to enter sewers / surface waters / ground water. Remove fire residues and contaminated aqueous wastes in suitable containers and dispose of them in a controlled manner.

#### 6.3 Methods and material for containment and cleaning up:

7. In case of small leakage, flush contaminated area with large amount of water or absorb with sand and non-combustible material and place in container. In case of large leakage, make a ditch away from liquid spills. Put spills into a clean, dry container with clean shovel, loosely closed, then transfer container from leak area.

#### 7.1 Reference to other sections:

Refer to section 8 – personal protection and section 13 – information on disposal.

### 8. Handling and storage

#### 8.1 Precautions for safe handling:

##### 8.1.1 Information on safe use:

Avoid inhalation of aerosol, contact with eyes, skin and cloth, as well as longer or repeated exposure. Provide sufficient ventilation of the working room (local exhaust ventilation if needful). If workplace exposure limits are exceeded, wear appropriate respiratory protection. Wash thoroughly after handling. Do not spray to avoid fast evaporation.

##### 8.1.2 Information on fire and explosion protection:

No special measures needful.

##### 8.1.3 Handling rules:

On workplaces only keep available amounts necessary for work progress. Don't leave receptacles stand open. Avoid spilling, preferable handle with non-breakable receptacles or use suitable protection containers on transportation of breakable receptacles.

### 8.2 Conditions for safe storage considering incompatibilities:

#### 8.2.1 Technical measures and storage conditions:

Keep opened container tightly closed again and stored upright to prevent leakage. Always keep in containers of the same material as the original. Store in a cool, dry place.

#### 8.2.2 Packing materials:

Packing materials must be tested for durability before use.

#### 8.2.3 Requirements for storage rooms and containers:

Storage in passages, passages, stairs, public areas, roofs, roofs and workrooms is not permitted. Do not use food containers because of the risk of confusion. Label containers clearly and permanently. If possible, keep in the original container, keep container tightly closed.

#### 8.2.4 Information on cumulative storage:

**Storage class:** non-combustible liquids.

Nothing but substances of similar properties should be cumulatively stored. Cumulative storage with substances as follows is prohibited:

- Pharmaceuticals, food and feed, including additives.
- Infectious, radioactive and explosive substances.
- Organic peroxides and very reactive oxidizing substances.

8.2.5 Further information to the storage conditions: none

8.3 Specific end uses: none

## 9. Exposure controls / personal protection

### 9.1 Control parameters:

9.1.1 Occupational exposure limits: TWA – 10 mg/m<sup>3</sup>

9.1.2 Biological exposure limits: not available

9.1.3 DNEL and PNEC values: not available

### 9.2 Exposure controls:

#### 9.2.1 Personal protection:

##### Respiratory protection:

 No respiratory protection is necessary when working with the small quantities intended for the product. In case of exceptional operating conditions, working with larger quantities and with the risk of aerosol formation use suitable respiratory protection, e.g. half-masks according to EN 140 with filters according to EN 143-P1. Observe wearing time limit.

##### Hand protection:

 At the risk of skin contact with the product, ensure adequate protection by wearing suitable protective gloves, e.g. according to EN 374. Before use, test protective gloves for suitability under the specific working conditions (e.g., mechanical resistance, product compatibility and antistatic properties). Observe the instruction and information on the use, storage, maintenance and replacement of protective gloves. Damaged and worn protective gloves should be replaced immediately.

##### Eye protection:

 Eye protection goggles with side protection (EN 166).

##### Skin protection

 Use clothing usual in the chemical industry. Skin protection agents are not as effective as protective gloves, so

they should be preferred as much as possible. If no protective gloves can be worn, apply water-insoluble skin protection preparations to the clean skin before starting work and after every break. Before breaks and at the end of work, skin cleansing with soap and water is required. After cleansing, use a greasy skin care product.

### Body protection:

Special body protection generally not required, normal work clothes adequate.

### General protection and hygiene measure:

Do not eat, drink or smoke during working hours. Keep away from food and drink. Avoid contact with eyes and skin. Remove contaminated and soaked clothing immediately. Wash hands before breaks and after work.
